

RITACCA LASER & COSMETIC SURGERY CENTER IMPROVES PATIENT EXPERIENCE AND RESULT WITH NEW NON-BRUIISING CANNULA

Vernon Hills, IL (October 7, 2011) – Ritacca Laser & Cosmetic Surgery Center is changing the dermal filler experience for the better with a needleless cannula. The needleless cannula creates a more comfortable experience for the patient and minimal bruising associated with injection of dermal fillers in the facial area.

The needleless cannula is a small tube that is inserted into various areas throughout the body, and it is often used by doctors or aesthetic surgeon for the delivery or removal of fluid. Ritacca Laser Center now utilizes this blunt cannula with most dermal filler injection sites.

Lori Langlie, patient at Ritacca Laser & Cosmetic Surgery Center says, “Bruising was a big concern and I experienced absolutely none....Dr. Ritacca was conservative and wanted to be sure I was going to be happy.” Langlie adds, “Everyone took their time and made me feel comfortable from the patient coordinator to check out at the front desk.”

Dr. Daniel Ritacca, medical director of Ritacca Laser & Cosmetic Surgery Center says, “Patients are pleasantly surprised with the level of comfort and the end result...using this non-bruising cannula also minimizes complications creating a much safer treatment.”

Surgeons are familiar with this non-bruising cannula, as it is used in fat transfers and other surgical procedures.

Ritacca Laser & Cosmetic Surgery center has noticed better placement of filler with the cannula, minimal to no bruising and a positive experience overall from the treatment. Touted as the “non-bruising needle”, the popularity of this dermal filler process also helps to eliminate the fear and pain that often comes with injection procedures.

The no-needle injection technique is a major advancement in aesthetic medicine for the safety and comfort of the procedure and for the amazing results. Ritacca Laser & Cosmetic Surgery Center is one of the few cosmetic surgery centers and medspas in the country that have begun implementing this industry-changing technique.

The Ritacca Laser & Cosmetic Surgery Center is a full-service medical spa and cosmetic surgery center that offers the latest in aesthetic medicine and plastic surgery today including; laser hair removal, laser skin rejuvenation, photofacials, Artefill, skin tightening, sclerotherapy, BOTOX®, dermal fillers and more.
